

Sumin Jo

Hanyang University
Language, Brain & Cognition Laboratory

Email: lovesuminn@hanyang.ac.kr
Website: <https://www.lbclab.com>

RESEARCH INTERESTS

Psycholinguistics & Computational Sentence Processing, Cognitive Neuroscience of Language (EEG & Eye-Tracking), Emotion-Syntax Interaction, Individual Differences in Semantic Representation

EDUCATION

- 2024.03-2026.08 **M.A. in German Language and Literature**, Hanyang University
Advisor: Yunju Nam, Ph.D.
Thesis: “The Effects of Word Valence and Arousal on Relative Clause Attachment Ambiguity in Korean”
- 2012.03-2019.02 **B.A. in Linguistics and Cognitive Science (Major) & TESOL and English Linguistics (Minor)**, Hankuk University of Foreign Studies
Advisor: Jongsup Jun, Ph.D.
Thesis: “A Comparative Analysis of Age, Meaningfulness, and Syllable Length in the Korean Dichotic Listening Test”

PUBLICATIONS

- Jo, Sumin**, & Nam, Yunju. (2026). The Effects of Word Valence and Arousal on Relative Clause Attachment Ambiguity in Korean. *Discourse and Cognition*, 33(2), 261-286.

PRESENTATIONS

- Jo, S.**, Nam, Y., & Choi, J. (2026, September). *Age Differences in the Online Integration of Emoji-Based Emotional Context in Digital Communication*. Poster accepted for presentation at the Architectures and Mechanisms for Language Processing (AMLaP 2026).
- Choi, J., Nam, Y., **Jo, S.**, & Lim, G. (2026, September). *Introducing HYN-KorPus: A Multimodal Neurocognitive Database for Korean*. Poster accepted for presentation at the Architectures and Mechanisms for Language Processing (AMLaP 2026).
- Jo, S.**, & Nam, Y. (2025, September). *The Role of Emotional Valence in Relative Clause Attachment Ambiguity Resolution in Korean*. Poster presented at the Architectures and Mechanisms for Language Processing (AMLaP 2025).
- Jo, S.**, Shin, A., Jung, D., Kim, J., & Nam, Y. (2025, July). *Response Patterns to Negative Polar Questions in Korean*. Oral presentation at the Student Session of the Korean Society for Psycholinguistics Conference.

Jo, S., & Nam, Y. (2025, June). *The Effect of Antecedent Noun Phrase Valence on Relative Clause Attachment Preference in Korean*. Oral presentation at the Summer Conference of the Korean Association for Language and Information.

CONFERENCE CONTRIBUTIONS

Choi, J., Nam, Y., **Jo, S.**, & Lim, G. (2025, October). *Comparing LLM Attention and Human Eye-Tracking Data in Korean Reading*. Presented at the 50th Anniversary Conference of the Linguistic Society of Korea, Session of the Korean Association for Language and Information.

Nam, Y., Kim, G., **Jo, S.**, & Lim, G. (2025, June). *Construction and Applications of a Cognitive Neuroscience Database for Korean Language Processing*. Presented at the Summer Conference of the Korean Association for Language and Information.

RESEARCH EXPERIENCE

- | | |
|-----------------|--|
| 2024.03-present | Graduate Research Assistant & Lab Manager
Language, Brain & Cognition Laboratory, Hanyang University <ul style="list-style-type: none">Managed participant recruitment, scheduling, IRB documentation, experimental protocols, and research assistant training across multiple projects.Conducted and coordinated EEG, eye-tracking, self-paced reading, and behavioral experiments. |
| 2024.09-2026.05 | Master's Thesis: The Effects of Emotional Valence and Arousal on Relative Clause Attachment Preferences in Korean <ul style="list-style-type: none">Designed a self-paced reading experiment in PsychoPy and analyzed sentence processing data using LMM/GLMM. |
| 2024.03-present | Construction of a Cognitive Neuroscience Database for Korean Language Processing (NRF-funded) <ul style="list-style-type: none">Prepared linguistic stimuli and experimental tasks for EEG, eye-tracking, and behavioral studies.Collected and organized EEG, eye-tracking, and behavioral data for a Korean language-processing database. |
| 2025.08-2025.12 | Reading Practices and Deep Reading in the AI Era (EBS Documentary Project) <ul style="list-style-type: none">Trained participants in self-question generation and managed behavioral data.Developed recall-task scoring procedures and a scoring interface for sentence and text recall assessment. |
| 2025.11-2026.03 | Digital Platforms and Everyday Innovation Research Program (Kakao Research Support Program) <ul style="list-style-type: none">Conducted dual-participant eye-tracking experiments on real-time KakaoTalk interactions between younger and older adults.Investigated age-related differences in emoticon processing using behavioral and eye-tracking measures. |

SKILLS

- R / Python / Jamovi (Statistical Data Analysis)
- EEG Data Acquisition (32-/64-channel systems; 100+ participants) /
Eye-Tracking Data Acquisition and Analysis (SMI Eye Tracking; 100+ participants) /
Self-Paced Reading / Behavioral Experiment Design and Stimulus Development
(Experimental Methods)
- PsychoPy / E-Prime / SMI Eye Tracking (Experimental Software)
